

Congress of the United States
Washington, DC 20515

May 20, 2025

The Honorable Mark C. Christie
Chairman
Federal Energy Regulatory Commission
888 First St., NE
Washington, DC 20426

Chairman Christie,

We write in support of the Commonwealth LNG project in Cameron Parish, Louisiana, and urge swift consideration of Commonwealth's application before the Federal Energy Regulatory Commission. Specifically, we ask you to add this matter to the June 2025 docket so that this project can move forward as soon as possible.

Commonwealth LNG's terminal is an important project that will contribute to American energy dominance due to its capacity to process up to 9.5 million tonnes per year of LNG upon project completion. Furthermore, the Commonwealth project represents a direct investment of \$4.5 billion in Louisiana, and construction of the terminal will generate 2,000 jobs during peak construction and maintain 200 jobs during regular operations.

Current predictions estimate global LNG demand to increase 60% by 2040, and Commonwealth LNG will support global energy security by supplying American-produced LNG to meet that increasing demand. Meeting global energy demands will reduce global reliance on LNG produced by our adversaries. Upholding Commonwealth LNG's authorization for the Cameron Parish project is crucial to broaden American presence in the global LNG market and ensure national security.

For these reasons, we urge you to move forward as quickly as possible to uphold the project's authorization during FERC's June 2025 Commission Meeting.

Respectfully,

Mike Johnson
Speaker of the House

Steve Scalise
House Majority Leader

Bill Cassidy, M.D.
United States Senator

John Kennedy
United States Senator

Clay Higgins
Member of Congress

Julia Letlow, Ph.D.
Member of Congress
